## **INTRODUCTION**

Rehabilitation for persons with disabilities (Divyangjan) is related to a range of measures from interventions to improve body function for social inclusion and integration. As per Article 26, United Nations Convention on the Rights of Persons with Disabilities (UNCRPD) defines rehabilitation as “appropriate measures, including through peer support, to enable persons with disabilities to attain and maintain their maximum independence, full physical, mental, social and vocational ability, and full inclusion and participation in all aspects of life”. It is estimated that in India, 2.21% of total population, around 2.68 corers suffers from one or other form of disability. The Constitution of India ensures equality, freedom, justice and dignity of all individuals and implicitly mandates an inclusive society for all including persons with disabilities. In the recent years, there have been vast and positive changes in the perception of the society towards persons with disabilities. It has been realized that a majority of persons with disabilities can lead a better quality of life if they have equal opportunities and effective access to rehabilitation measures. The services of Physiotherapy, Occupational Therapy, Prosthetic and Orthotic professionals along with other medical & paramedical professionals are essential at different stage to prevent, manage disability and their rehabilitation.

## **DISABILITY HAS BEEN BROADLY GROUPED AS**

- A. Physical Disability
  - a. Locomotor disability
  - b. Visual Impairment
  - c. Hearing Impairment
  - d. Speech & Language Disabilities
- B. Intellectual Disability
  - a. Specific learning disabilities
  - b. Autism spectrum disorder
- C. Mental Disability
- D. Disability caused due to-
  - a. Chronic neurological conditions
  - b. Blood disorder
- E. Multiple Disability
- F. Any other category as may be notified by the Central Government

Although Government, NGOs and some civil society Institutions have been providing services to the persons with disabilities since long, but these efforts have gained momentum since 1970's, when the decade was marked by a new approach to disability with the concept of "Rights for Disabled Persons". The United Nations took the lead and issued declarations relating to Rights to the Disabled Persons (1975). The 1983-92 was declared as the "Decade of the Disabled Persons". This was followed by the "Asia and Pacific Decade of Disabled Persons" (1993-2002). The standard rules for the equalization of opportunities for persons with disabilities were adopted by the UN General Assembly in 1993.

In 1995, Indian Parliament introduced "Persons with Disabilities (Equal Opportunities, Protection of Rights and Full Participation) Act" 1995, is adopted by all the states and union territories. The act defines the responsibilities of the central and state Governments regard to the services to the persons with disabilities. It mandates affirmative action for ensuring useful life to disabled person and refers to the need for action on prevention of disability, provision of medical and other services to minimize the impact of impairment on account of diseases & accidents etc. It also refers to rehabilitation through education, vocational training, barrier free environments, assistive aids and other interventions. In 2016, Country finally witnessed the much awaited Rights of Persons with Disabilities (RPWD) Bill on 14th December, 2016 in the Rajya Sabha and subsequently in the Lok Sabha on 16th December, 2016. The Bill was further approved and signed by the Hon'ble President and 'notified' by the Government in its official Gazette on 28th December, 2016. Thus, RPWD Bill 2016 was 'enacted' and became a 'LAW', the Rights of Persons with Disabilities (RPWD) Act, 2016. It covers 21 categories of disabilities from the previous 7 categories under the 1995 Act, this new Act lays complete emphasis on one's rights – right to equality and opportunity, right to inherit and own property, right to home and family and reproductive rights among others. Unlike the 1995 Act, the new Act talks about accessibility - setting a two-year deadline for the government to ensure that persons with disabilities get barrier-free access to physical infrastructure and transport systems. Additionally, it will also hold the private sector accountable. This also includes educational institutions 'recognized' by the government such as privately owned universities and colleges. A path-breaking feature of the new Act is the increase in reservation in government & private jobs from 3% to 5%.

Since 1970, Govt. of India has established several institutions to train professionals/manpower in the field of rehabilitation. There are eight National Institutes viz, National Institute for Locomotor Disabilities (Divyangjan), Kolkata, AYJ National Institute for Speech & Hearing Disabilities, Mumbai, National Institute for Intellectual Disabilities, Secunderbad, Swami Vivekanand National Institute of Rehabilitation Training and Research, Cuttack, Pt. Deen Dayal Upadhaya Institute for the Persons with Physical Disabilities, New Delhi and National Institute for Empowerment of Persons with Multiple Disabilities, Chennai. Indian Sign Language Research and Training Centre (ISLRTC), New Delhi. These Institutes are conducting training programs at Certificate, Diploma, Degree and Postgraduate levels in their respective disciplines. The Institutes also carry out research; develop models of rehabilitation service, manpower development, and clinical & therapeutic service. They also have extensive outreach programs so that services are available in a decentralized manner. Over the years, the Institutes have trained thousands of professionals who are in their careers in the Country and abroad. In addition to above, the Ministry has also established Composite Regional Centres at Srinagar, Sundernagar, Lucknow, Bhopal, Guwahati, Patna, Ahmedabad, Kozhikode, Tripura and other states. District Disability Rehabilitation Centres are running at present under DDRS scheme, supporting to voluntary action programs and National Program for Rehabilitation of Persons with Disabilities under state sector scheme. For further information, Website <http://disabilityaffairs.gov.in> may be visited.

## **1. TRAINING PROGRAMMES**

The Department of Empowerment of Persons with Disabilities, Ministry of Social Justice and Empowerment supports manpower development in the field of rehabilitation through National Institutes, who are offering a number of courses for which entrance test is being conducted. Amongst them, some are in the area of

- (i) Prosthetics & Orthotics**
- (ii) Physiotherapy**
- (iii) Occupational Therapy**

### **1.1 PROSTHETICS & ORTHOTICS**

Prosthesis is an artificial replacement or substitute for a loss part of a limb amputates due to congenital or acquired causes. The profession got its recognition more in early seventies in post war era. This was due to the sudden increase in number of war victim amputees requiring fitments of artificial limbs (Prosthesis).

Orthosis is a device applied over body to the individual to support, maintain or correct the deformity in a weakened part of body. It may also be applied with the additional objective to assist, allow or restrict movement of joint of body. Orthotics is the practice to design, fabricate, the orthosis.

After successful completion of the course, a student may get placement as a Prosthetist/Orthotist in Rehabilitation Centres, Hospitals, Trauma Centres, Multinational companies and Manufactures, Academic Institution and Self employment, in Government and non-government sector in the Country and abroad.

The avenues for higher studies & research in the area of Prosthetics and Orthotics are enormous.

### **1.2 OCCUPATIONAL THERAPY**

Occupational Therapy aims to provide therapeutic and functional management to the disabling medical conditions (Physical and mental) so as to enable them to perform maximum possible function independently viz. daily living activities, play, performance at the work place through sensory integration therapy, work simulators, EMG-Biofeedback, therapeutic activities, etc. In occupational therapy, modified, adaptive/assistive & supportive devices are also developed and used to make the life more independent, productive and dignified.

As an indispensable member of a medical/rehabilitation team, this discipline; one find a wide scope in various hospitals, NGOs, Paediatrics Hospital & psychiatric centres, industrial setups, educational institutions, sports industries, homes for aged, reconstructive/plastic surgery and leprosy rehabilitation centers etc. The community based rehabilitation is another area where occupational therapy is being recognized as an important component.

A successful candidate has job opportunities as therapist, teaching faculty, researcher in Government & NGOs, self-employment, consultant/advisor in industrial & educational institutions etc. in the Country & abroad.

The avenues for higher studies in occupational therapy in the specialties like rehabilitation. Orthopaedics, Hand Rehabilitation, Developmental disabilities & neurology, psychiatry, sports etc. & research are also available.

### **1.3 PHYSIOTHERAPY**

Physiotherapy is an allied health profession, which emphasizes the use of physical agents in the management of diseases, prevention & rehabilitation of disabling conditions. Physiotherapy deals with problems particularly those associated with Neuromuscular, Musculo-skeletal and Cardio-vascular & Respiratory systems. The therapeutic methods are based essentially on movement, manual therapy and use of physical agents.

A Physiotherapist is trained to assess, plan and provide therapeutic services to the individual with sensory and motor deficit. After successful completion of the course, a student can seek placement as a physiotherapist in hospitals, rehabilitation centres, and Physiotherapy clinics and as a faculty in the concerned subject etc. The avenues for higher studies & research are also there. The specialization in physiotherapy in the area of Orthopaedic, neurology, Paediatrics, sports, rehabilitation, chest physiotherapy & specialized techniques like manual therapy, electrotherapy etc. are also coming up.

## **2. INSTITUTES UNDER CET-2019**
